EDUCATION

Princeton University
Princeton, NJ
B.A., Philosophy, 2011

EXPERIENCE

Human Predictions

Contract Web Developer and Machine Learning Engineer | Feb 2019 - Dec 2019

- Built a machine learning pipeline
- Scraped data from relevant sources for use in a statistical model
- Fixed bugs and implemented new features in an existing Ruby on Rails application
- Acted as a bridge between the web development and data science teams

Cannaport

Contract Lead Engineer | Sep 2018 - Sep 2019

- Built a Phoenix app for a B2B cannabis logistics platform
- Interviewed candidates for positions at the company

OpenAI

Scholar | June 2018 - Aug 2019

- Studied machine learning under the tutelage of Igor Mordatch, an OpenAI researcher
- Developed a final project for which I built a model to predict the motion of objects in a bounded environment

Hashrocket

Software Engineer | July 2017 - May 2018

- Worked as a software consultant for companies across industries as diverse as fintech, ecommerce, and cloud computing
- Wrote blog posts on topics like neural networks, PostgreSQL databases, and writing documentation

Tandem Software

Jr. Software Engineer | Apr 2015 - Mar 2017

- Built custom software solutions for clients in various industries including education, healthcare, and agriculture
- Organized a monthly hack night for Chicago developers

Tandem Software

Software Apprentice | Sep 2014 - Mar 2015

- Paired with senior engineers to sharpen skills in test-driven development and writing code that aligns with best practices
- Became familiar with agile software development
